

DIASPORACART

Complete Design System

Premium · Warm · Trustworthy · Algerian · Community-first

Token	Value	Usage
Primary	#0F5D4A	Brand buttons, active states
Primary Dark	#073D32	Hero backgrounds, dark surfaces
Olive	#688F5F	Secondary accents
Warm White	#FBFAF6	Main app background
Ivory	#F7F5EF	Secondary background
Sand	#EADCC8	Borders / warm surfaces
Text	#12332D	Primary text
Success	#16805E	Verified / delivered
Warning	#B7791F	Pending states
Error	#C94B45	Errors / destructive
Accent Red	#D0645A	Campaign / emotional highlights

1. Brand Foundation

Brand personality: Warm, trustworthy, premium, Algerian, and community-driven.

Design statement: Modern logistics with the warmth of a community.

Core hierarchy: Person / place / product image → Main action → Trust information → Supporting information → Secondary actions.

Rule: Do not decorate. Communicate. Every element should have a reason to exist.

2. Typography

Primary: Plus Jakarta Sans — 400, 500, 600, 700, 800. Use for headings, buttons, navigation and important numbers.

Secondary: Inter — use for long descriptions, metadata, forms and dense information.

Type scale: Display XL 48/1.05 · Display 40/1.08 · H1 32/1.15 · H2 28/1.2 · H3 22/1.25 · H4 18/1.3 · Body L 17/1.55 · Body 15/1.5 · Small 14/1.45 · Caption 12/1.4 · Micro 11/1.3.

Mobile: H1 28px, H2 24px, body 15px. Do not simply scale the desktop UI.

3. Spacing & Layout

Grid: 8-point spacing system: 4, 8, 12, 16, 20, 24, 32, 40, 48, 64, 80, 96px.

Desktop: 1200–1280px content width, 24–48px page padding, 12-column grid with 24px gutters.

Tablet: 24px padding, 8-column grid, 20px gutters.

Mobile: 16px padding, 4-column grid, 16px gutters.

Principle: Generous whitespace is a key part of the premium feeling.

4. Radius & Elevation

Radius: Small 8px · Medium 12px · Large 16px · XL 20px · XXL 24px · Pill 999px.

Shadows: Soft only: sm 0 2px 8px rgba(18,51,45,.06), md 0 8px 24px rgba(18,51,45,.08), lg 0 16px 40px rgba(18,51,45,.12), xl 0 24px 60px rgba(18,51,45,.15).

Cards: White surface, warm border, 16–20px radius. Avoid heavy shadows.

5. Buttons

Primary: Green #0F5D4A, white text, 48px height, 20px horizontal padding, pill radius, 600 weight.

Secondary: Transparent, 1px neutral border, dark green text.

Soft: Light green #E7F4EE background with primary green text.

Destructive: Light red #FCEAEA background with #C94B45 text.

Icon button: 40×40px desktop, 44×44px mobile.

6. Forms & Controls

Input: 52px height, white background, #DDE4DF border, 14px radius.

Focus: Primary border + 3px soft green focus ring.

Segmented control: Light neutral container, 4px inner padding, 40px height, pill radius. Active segment is primary green.

Chips: Compact, pill-shaped, concise labels. Avoid overloaded badges.

7. Navigation & Icons

Mobile navigation: Five items: Accueil, Rechercher, Mes voyages, Messages, Profil. ~76px height, translucent white surface, active primary green.

Icons: Lucide-style outlined icons, 1.8px stroke, rounded. Suggested: Plane, Package, MapPin, Calendar, ShieldCheck, Heart, MessageCircle, Search, User, House, Clock, CreditCard, Truck, Users, Bell.

Consistency: Do not mix filled and outlined icon families.

8. Photography & Heroes

Photography: Human, cinematic, authentic, Algerian, premium. Prefer original photography over generic stock.

Card image: 16:10 ratio, object-fit cover, 16px radius.

Travel hero: 9:16 campaign imagery or immersive landscape.

Overlay: Use a subtle dark gradient from transparent to ~72% black at the bottom.

Hero types: Travel hero, editorial hero, and dark brand hero.

9. Algerian Visual Language

Geometry: Use subtle zellige/traditional geometric inspiration at 4–8% opacity.

Avoid: Do not cover the UI with flags, ornaments or clichés.

Goal: The Algerian identity should be felt through photography, color, typography and subtle pattern—not decoration everywhere.

10. Trust & Status

Verified: Green semantic styling with ShieldCheck/UserCheck/Phone icons.

Delivery timeline: Accepted → Picked up → In transit → Delivered. Completed/active green, pending amber, inactive neutral.

Route component: Visual route with flags, city names, plane icon and direction rather than plain text only.

Status dots: Green = active/delivered, amber = pending, red = problem.

11. Messaging

User bubble: Primary green background, white text, 18px radius.

Other bubble: Warm neutral background, dark text, 18px radius.

Image message: 16px radius.

Timestamp: 11px, muted opacity.

12. Motion

Fast: 120ms for icon changes, hover and toggles.

Normal: 200ms for buttons, cards and inputs.

Emphasis: 350ms for modals, page transitions and hero elements.

Easing: cubic-bezier(.2,.8,.2,1).

Accessibility: Respect prefers-reduced-motion.

13. Accessibility

Touch target: Minimum 44×44px.

Contrast: Target WCAG AA for normal text.

Focus: Visible focus ring using soft green.

Interaction: Never communicate important information by color alone.

14. Component Architecture

UI: Button, IconButton, Input, Badge, Avatar, Card, Modal, Tabs, SegmentedControl.

Navigation: BottomNavigation, Header, Breadcrumb.

Travel: TravelCard, Route, TravelHero, TripTimeline, TravelStatus.

Delivery: DeliveryCard, DeliveryTimeline, PackageCard.

User: Avatar, VerifiedBadge, UserCard.

Messaging: ChatBubble, ChatInput, ConversationCard.

15. Product Screens

Core screens: Home, Search, Add Trip, Trip Detail, Requests, Tracking, Messages, Profile.

Consistency rule: All screens should reuse the same tokens and component primitives. Avoid designing each page as an isolated mockup.
